THREE TYPES OF PERSONAL PASSPORTS FOR BULGARIAN CITIZENS

There has been a slight decrease in terror in Bulgaria. Some concentration camps were abolished and some prisoners were transferred to other camps, while others (4,000) were liberated. This should not be regarded as the end of the terror, but only as the calm before the storm. This storm will be unleashed when the law on personal passports

is applied. This law has gone into the law on personal passports effect, and the State Security Police is now checking applications for the new passports which are to be issued in exchange for identity cards.

50X1-HUM

After this check, the citizens will be divided into three categories. The first category will include party members and government supporters who have already obtained red passports. These red passports will enable a person to travel freely throughout Bulgaria and establish residence in Sofia. The second category will include state officials and mass organization leaders who will be issued blue passports. The blue passports will enable their holder to circulate freely within a given province /okrug? The third category, to be issued yellow passports, will include the masses, who will not be permitted to cross the limits of their cities or villages and will not be able to travel even 3 kilometers without special authorization obtained previously. Thus the entire country is being transformed into a large concentration camp and one should no longer be suprised at the abolition of some existing camps.
